DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11-14 and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al. (5,465,011).

Miller et al. disclose an uninterruptible power supply with improved output regulation in Fig. 1. An input power conditioning circuit 8, power control circuit 14, input signal indicative of input power 103/110 and 114, output signal indicative of output power 48 and 54, DC bus 25, estimator circuit 14, power factor correction 20, bus capacitor 127/128, input current signal indicative of input current 114, input voltage signal indicative of voltage 103 and passive component coupled to the DC bus for storing and delivering power 24.

Allowable Subject Matter

3. Claims 10 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: None of the cited prior art disclose or teach a power control circuit with the

power output signal indicative is derived for measurement of at least one of a torque and velocity output.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McClain discloses a power factor correction control circuit for regulating the current wave shape in a switching power supply.
